LANDSAT and the Rise of Earth Resources Monitoring

November 1st, 2018 - Landsat was a government enterprise because NASA leaders thought it would benefit the space program to show more practical results and political issues such as the proper use of data collected over other countries made the government nervous of allowing private enterprise to get into the business in the early years 33 An alternate model that the government might provide Earth resources satellite data as a public good like weather satellite data never gained official acceptance
